

Collaboration and Document Storage Accelerator

Insurance teams deal with **endless email threads**, **scattered files**, and **disjointed conversations**, slowing down risk workflows and increasing operational risk. It doesn't have to be that way.

With Vega IT - **the official Whitespace integration partner**, you can seamlessly connect Whitespace to your collaboration stack, including **Microsoft Teams, Slack, SharePoint, OneDrive, Outlook, and Gmail**.

This accelerator delivers real-time updates, auto-stores key documents, and links directly to specific risks, so your team always has the right information, in the right place, at the right time.

Focus
your
efforts.

Unify your
workflow.

Improve broker and underwriter responsiveness

Sends real-time notifications (Email, Slack, Teams...) keeping all stakeholders informed instantly and accelerating decision-making.

Centralised and searchable contract repository

All contracts are stored in a structured and centralised system, improving accessibility, transparency, and searchability across teams.

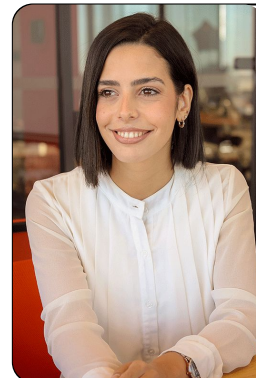

Improved compliance and audit trail

All actions and document versions are tracked in a central system, supporting compliance requirements, reducing errors, and making audits simpler.

Flexible to match your processes

Configure event triggers, document templates, and approval paths to align with your unique team workflows, reducing manual steps and fitting seamlessly into existing operations.

- ➔ Integration adapters for Teams, Slack, SharePoint, OneDrive, Outlook, Gmail
- ➔ Email integration to capture attachments and upload into Whitespace
- ➔ Auto-sync with DMS for storing draft/final contracts
- ➔ Custom notifications into collaboration tools
- ➔ Configurable triggers to fit internal workflows
