

Struggling to gain insights on your risk portfolio within Whitespace?

vega IT

Whitespace[™]
a Verisk business

Management Information Accelerator

Whitespace is an innovative digital-first trading platform for specialty insurance, offering over 100 APIs to enable seamless integration. These APIs support **efficient workflows, streamlined data exchange, attachments and risk-level chat.**

Vega IT has developed targeted solutions to simplify integration. Our MI Accelerator gives brokers and underwriters **centralised access** to essential contract and risk data, delivering immediate **operational and placement insights.**

Technical solution

Our **MI Accelerator** simplifies the orchestration of Whitespace APIs, specifically designed to **integrate seamlessly with your existing management information platforms.**

Leveraging API endpoints, the accelerator efficiently captures essential risk, endorsement and stamp data, delivering consistent and ready-to-use outputs.

Easily integrated with business intelligence tools-like Power BI, Tableau, or custom dashboards. This solution significantly reduces manual data handling, providing streamlined, error-free insights to support better decision-making.

REDSHIFT

Centralised access to Whitespace data

Unlock essential risk and endorsement data with API collections that serve as your single source of truth for MI reporting.

Fast and easy integration

Speed up reporting with plug-and-play API endpoints delivering data tailored for your MI tools.

Improved data-driven decisions

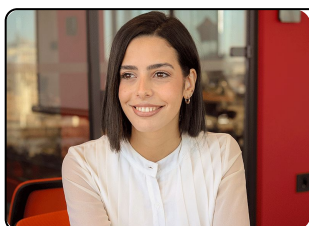

Deliver timely, accurate insights to decision-makers by integrating real-time Whitespace data into your existing dashboards.

Reduced operational overhead

Automate data flow into MI tools, eliminating manual report generation and improving reliability.

Flexible and scalable solution

Choose the data you need, when you need it. API collections are modular and can evolve with your reporting requirements.
